WHY CHOOSE US?

R&R General Contracting is a boutique-style design-build remodeling firm. We are experts in complete renovation ranging from remodeling within the same footprint to more complex projects involving removing or adding walls/columns, adding structural support, and modifying mechanical, electrical, and HVAC systems. What makes us unique is that our entire team of tradespeople, vendors, and suppliers have worked together for over a decade. We start by listening to your needs and then creating a design for your space with beauty that will last the test of time. Once you approve every detail and are ready to move forward, we start production, and that's when the real magic begins.
